We want the international movement of contemporary ice skating to grow in an open-minded, respectful, and supportive atmosphere.

Creating a solid ground

The visionaries coming together at the UNFREEZE-Festival have their background in figure skating as a sport or entertainment. Still somehow connected to these two long standing traditions of figure skating they seek to give ice skating a new dynamic and make it move towards new directions.

In order to redefine ice as a valid ground base for contemporary art we need to strengthen the possibilities of producing work in this new field, leading to innovative and complex artistic creation.
